EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Vincent Wen Jeng Lue (56,564) on May 25, 2006.

The application has been amended as follows:

Amend the claims according to the proposed amendment submitted as an attachment to e-mail from the applicant on May 25, 2006.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not expressly teach or render obvious the invention a recited in independent claims 1, 3, 15, 17 and 25.

The prior art discloses a system management applications [col. 6, lines 32 – 43 of Danielson] for managing a host system [col. 6, lines 19 – 32 of Danielson], determining if an unprocessed record [col. 10, lines 26 – 37 of Danielson] is present in a system event log [col. 10, lines 26 – 37 of Danielson], a system management application obtaining exclusive use of a system event log [col. 4, lines 50 – 61 of Van Fleet], preventing the second system management application from accessing the system event log concurrently [col. 4, line 52- col. 5, line 6 of Van Fleet], and a first

system management application obtaining a first identifier corresponding to an unprocessed record [Next SEL Record ID; p. 97, Section 18.5 of IPMI1.0]. However, the prior art does not disclose a plurality of system management applications executing concurrently, a first system management application determining if an unprocessed record is in a system event log of an Intelligent Platform Management Interface operating in a host system by sending a request to a software process through a message queue, the software process granting exclusive use of the IPMI system event log, obtaining a first identifier corresponding to an unprocessed IPMI event, the first identifier being derived from a second identifier stored in an identifier file, and the first system management application storing the first identifier after processing the IPMI event.

In addition, the prior art of record does not provide a basis of evidence for asserting a motivation that one of ordinary skill level in the art at the time the invention was made would have integrated or modified the system management application to incorporate the features of a first system management application determining if an unprocessed record is in a system event log of an Intelligent Platform Management Interface operating in a host system by sending a request to a software process through a message queue, the software process granting exclusive use of the IPMI system event log, obtaining a first identifier corresponding to an unprocessed IPMI event, the first identifier being derived from a second identifier stored in an identifier file, and the first system management application storing the first identifier after processing the IPMI event as recited in the context of independent claims 1, 3, 15, 17 and 25.

Art Unit: 2194

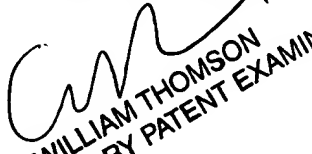

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
